

Exhilarating performance as fine art

Designed to inspire and to please. Engineered to respond predictably to every command. And built to deliver an exhilarating driving experience that, on every outing, reminds you why you love taking to the open road. Meet the expressive styling of the all-new Mazda3. The bold lines of its sporty new face employs Mazda's unique five pointed grille to improve engine cooling and aerodynamic efficiency. Body contours that create an air of dynamic agility; and overall form with an aggressive stance that strongly suggests impending motion and fun behind the wheel. Meticulous revisions to the steering, suspension and aerodynamics contribute to class-leading levels of agility, braking, and cabin quietness. Engine and transmission refinements optimize performance and fuel economy for enhanced Zoom-Zoom driving pleasure with less impact on the environment. Ergonomic redesign of the interior makes sports driving all the more enjoyable. Comfortable driving position, seats with better fit and support, and easy to operate controls add to the excitement. Fun to drive, satisfying to own, and environmentally responsible — the all-new Mazda3. It's a true masterpiece.
